These represent three different operating cycles, each with its own pace and components. The functionality and workflows of BoardEffect have been designed to support boards as they manage the responsibilities inherent within these demanding, interdependent, and mission critical cycles.

Board members access their critical information via Android, iOS or any browser-supported device in a secure environment which protects sensitive board information through our 5 Tier Security program using a state of the art dedicated SOCII infrastructure. Board executives and administrators easily streamline the creation, review, approval and dissemination of important board materials. For more information, please visit: <http://www.boardeffect.com/>
